

FASIH UR REHMAN

Software Engineer

fasihur54@gmail.com | 0332-3646064 | linkedin.com/in/fasih-ur-rehman-636784286 | github.com/coder5412

SUMMARY

Software Engineering graduate with hands-on experience across the full development lifecycle — building backend services and REST APIs with Java/Spring Boot and Python/Flask, working with SQL and NoSQL databases, and applying SDLC/Agile practices in team projects. Strong quality-assurance background (manual, functional, regression, and API testing) that translates into writing reliable, well-tested code. Comfortable working across Java, Python, and JavaScript, and quick to pick up new stacks and tools.

WORK EXPERIENCE

Intern Software Engineer — Cognize Solution

Sep 2024 – Dec 2024

- **Assisted** in developing and testing web application features as part of an agile development team.
- **Built** and debugged application functionality alongside developers, then verified it through functional testing.
- **Tested** REST APIs using Postman and identified, documented, and reported defects for resolution.
- **Collaborated** with the engineering team to resolve bugs and improve overall software quality.

SEO Intern — TechStep Solutions

Sep 2025 – Nov 2025

- **Conducted** website quality analysis and optimization, including performance and usability testing.
- **Validated** website functionality after content and code updates to ensure a stable user experience.
- **Used** analytics and monitoring tools to track site performance and surface technical issues.

PROJECTS

Ecommerce Backend System — Java, Spring Boot

- **Designed** and built a backend e-commerce application with secure, well-structured RESTful APIs.
- **Implemented** product management, user authentication, cart, and order-processing modules.
- **Wrote** thorough API test suites in Postman and focused on clean, scalable, maintainable code.

Contact Manager-AI — Python, NLP

- **Built** an AI-powered contact management system with natural-language search, duplicate detection, and smart categorization.
- **Integrated** NLP for conversational queries and predictive tagging on a scalable, secure REST architecture.

Real-Time Gesture to Voice Converter — Final Year Project

- **Built** and tested an AI-based mobile application that converts sign language gestures into text and speech.
- **Designed** test cases for gesture recognition and end-to-end application workflows, including API testing in Postman.
- **Validated** system functionality, usability, and response accuracy, and helped resolve reliability issues.

Taleem Wallet — Scholarship Platform

- Contributed to a scholarship platform connecting students with verified funding via a transparent, merit-based system.
- Supported development of a provider dashboard for managing scholarships and applications, and free nationwide student access.

SKILLS

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Back-End Frameworks:** Spring, Spring Boot, Flask
- **Front-End Technologies:** HTML, CSS
- **Databases:** MySQL, PostgreSQL, SQLite
- **Testing & QA:** Manual, Functional & Regression Testing, Postman, Selenium (Basic), JIRA (Basic)
- **Methodologies & Tools:** SDLC, STLC, Agile, Scrum, Git

EDUCATION

Bachelor of Software Engineering (BSSE) — CGPA 3.1 — Dhal Suffa University

Oct 2022 – Jun 2026

- **Coursework** covering software development, databases, object-oriented programming, web technologies, and software testing.
- **Collaborated** on individual and team projects using Agile practices, strengthening problem-solving and communication skills.
