## SUMMARY

Software Engineering Graduate with a strong foundation in Software Quality Assurance (SQA), Software Testing, and SDLC/STLC. Experienced in testing web and mobile applications, validating RESTful APIs, executing manual test cases, reporting defects, and ensuring software quality. Familiar with functional, regression, integration, and API testing, with knowledge of SQL for database validation.

## WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                |

**EDUCATION**

---

**Dha Suffa University**

Oct-2022 - June-2026

Bachelor of Software Engineering(BSSE) - 3.2

- Built a strong foundation in software engineering through coursework and practical projects, covering software development, databases, object-oriented programming, web technologies, and software testing.
- Collaborated on individual and team projects using Agile practices while strengthening problem-solving, analytical, and communication skills.
